ABOUT THE WEBINAR

ONE DAY NATIONAL WEBINAR

ON

“NEW EDUCATION POLICY: PERSPECTIVES AND CHALLENGES”

September 5th , 2020 (Saturday)

ORGANISED BY

FACULTY OF EDUCATION

JAGAN NATH UNIVERSITY BAHADURGARH, HARYANA (INDIA)

State Highway -22, Bahadurgarh – Jhajjar Road,
Dist. - Jhajjar, Haryana

Education is a very important factor for the development of a country. We should make it appropriate according to the time and changing scenario of the world. Education provides an opportunity to reflect upon the social, economic, cultural, and moral issues faced by human beings.

Education makes our life a better.

The **National Education Policy** was framed in 1986 and modified in 1992. More than three decades have passed since previous Policy. During this period significant changes have taken place in our country, society economy, and the world at large. It is in this context that the education sector needs to gear itself towards the demands of the 21st Century and the needs of the people and the country. Quality, innovation and research will be the pillars on which India will become a knowledge super power. Clearly, a **new Education Policy is needed.**

Considering this, the government of India launched NEP, 2020 with major changes it would be imperative to understand these changes to shake the education and career in future. In that context JIMS School of Education is organising the Webinar to create awareness among educators to avail the opportunity to know about the new education Policy. The students and faculty members from all streams are cordially invited to join the webinar.

Education is fundamental for achieving full human potential, developing an equitable and just society, and promoting national development. Providing universal access to quality education is the key to India’s continued ascent, and leadership on the global stage in terms of economic growth, social justice and equality, scientific advancement, national integration, and cultural preservation.

Universal high-quality education is the best way forward for developing and maximizing our country's rich talents and resources for the good of the individual, the society, the country, and the world.

Education Policy lays particular emphasis on the development of the creative potential of each individual. It is based on the principle that education must develop not only cognitive capacities - both the ‘foundational capacities ’of literacy and numeracy and ‘higher-order’ cognitive capacities, such as critical thinking and problem solving – but also social, ethical, and emotional capacities and dispositions.

The new education policy must provide to all students, irrespective of their place of residence, a quality education system, with particular focus on historically marginalized, disadvantaged, and underrepresented groups.

OBJECTIVES

- To discuss the vision of NEP-2020
- To create awareness about structural reforms in education system
- To discuss and analyze curricular, pedagogical reforms suggested in the policy
- To discuss the role of learners, teachers and society in policy implementation
- To develop understanding among participants about the access, equity, quality and inclusion as the underlying principles of the policy
- To discuss the policy provisions pertaining to multidisciplinary education, teacher education, vocational education and technology in education
- To understand the role of NRF as a catalyst for research process
- To understand the role of teachers envisaged in the new education policy.
- To know how teachers should be further oriented, prepared and trained.
- To know how the University/Institutions are to be revamped in accordance with the new education policy.
- To know how the research has to be oriented or changed in tune with the requirements of various stakeholders.
